

Figure 1: Schematic representation of the genetic architecture of the 12 quantitative trait loci (QTLs) for the 12 traits. The diagram shows the genetic architecture of 12 traits, each represented by a horizontal line with various QTLs and their associated effects. The traits are: 1) Grain yield (t/ha), 2) Grain yield (t/ha), 3) Grain yield (t/ha), 4) Grain yield (t/ha), 5) Grain yield (t/ha), 6) Grain yield (t/ha), 7) Grain yield (t/ha), 8) Grain yield (t/ha), 9) Grain yield (t/ha), 10) Grain yield (t/ha), 11) Grain yield (t/ha), 12) Grain yield (t/ha). The QTLs are labeled with their names and the traits they affect. The traits are listed on the right side of the diagram, and the QTLs are listed on the left side.
